

14 AUG 1980

STAT

We received your status request letter of 23 July 1980 on 29 July. You reminded us that we have yet to respond to your inquiry of 30 April 1980 regarding the status of your Freedom of Information request on

We must apologize for not responding sooner to your correspondence, but we felt at the time that more documents would shortly be available for release.

STAT

The documents we had located and reviewed had to be coordinated with another component which was already working on documents associated with your request. The documents sent to them for coordination were incorporated into their document review process. All documents pertaining to will, consequently, be reviewed as a unit.

STAT

The component in question is the most heavily backlogged of all. As we have pointed out earlier, there is no way to predict when work on your request will be completed. While we recognize this is little solace to one who has been waiting over three years, there is nothing we can suggest except that you may exercise your right of appeal under the Act.

Sincerely,

John H. Bacon  
Information and Privacy Coordinator
